

IT Asset Disposal Services

Asset Remarketing is a trusted partner to many UK organisations large and small; We provide practical solutions for used IT equipment including Data Destruction, Direct Purchasing and IT Disposal.

Asset Remarketing minimizes environmental impacts and maximises financial returns by operating within the waste hierarchy to reuse equipment, reduced waste and recycle materials.

We are specialists in the remarketing of new, used and surplus IT equipment, by providing a straight forward service we provide both the ability to dispose of equipment and get money back for it.

Asset Remarketing Services have the facilities necessary to provide you with a complete peace of mind service and demonstrate that your equipment is securely handled – any waste will not end up in a landfill – it's our promise.

We recycle all types of computer hardware including but not limited to:

- Towers, server chassis and other base units.
- Laptops, notebooks and Tablets
- TFT and CRT monitors.
- Office equipment such as printers, faxes and photocopiers.
- Hard disk drives, Tape and floppy drives.
- UPS batteries

The key features of our Asset Disposal services are:

- Free IT Recycling Services
- Direct IT Equipment Purchases
- IT Equipment Remarketing Services
- Financial Payments within 10 day
- Securely tracked vehicles and security vetted staff.
- Onsite Data Destruction services.
- Full Documentation and **Certificate of destruction.**
